

KidneyAI Diagnostic Report

AI-Powered Chronic Kidney Disease Assessment

Report Information

Report ID: KID-34F43002

Date & Time: 15-06-2026 16:00:47

Assessment Source: Multimodal Fusion

Risk Level: N/A

Analysis Summary

Prediction Status: Not CKD

Confidence Score: 49.49%

Clinical Score: 1.75%

Ultrasound Score: 97.23%

No Evidence of CKD

Confidence: 49.49%

Clinical Recommendations

- Continue regular health monitoring
- Maintain healthy lifestyle habits
- Schedule periodic clinical assessments
- Follow preventive health guidelines

Clinical Interpretation

This AI-powered diagnostic report provides clinical decision support based on the analysis of patient clinical parameters and/or renal ultrasound imaging. The assessment is designed to assist healthcare professionals in identifying potential cases of Chronic Kidney Disease. However, this report should be interpreted in conjunction with comprehensive clinical evaluation, laboratory results, and imaging studies. A qualified healthcare professional must review all findings and clinical context before making any diagnostic or treatment decisions.
